Diversity and Equity Core Values

1. High Expectations for All

We believe all students will learn and be successful, and recognize that students have different learning styles, and we must provide equitable support.

2. Continuous Improvement

We will continue to develop diverse and inclusive curricula that reflects the wide range of voices, perspectives, and experiences of the students and families in our community and the world.

3. Meaningful Collaboration

We understand the benefit of collaboration in providing equitable access to services, school resources and other learning opportunities to eliminate educational inequities.

4. Rich Diversity

We believe in meeting the needs of a growing and diverse student population and understand that by valuing and supporting our multicultural and multilingual students and their families, students will be more successful.
